CACTUS

1.1 Korišćeni programski jezici

U izradi sajta korišćeni su slededi programski jezici: HTML5, CSS3, JAVASCRIPT, JQUERY.

1.2. Opis funkcionalnosti

Dropdown menu se nalazi na svakoj stranici i rađen je u JavaScriptu.

Kontakt forma pritiskom na dugme ispisuje da podaci nisu dobrog formata i prilikom izlaska iz fokusa prikazuje da je potrebno uneti podatke i okvir polja je obeležen crvenom bojom. – contact.html

Registracijska forma pritiskom na dugme ispisuje da podaci nisu dobrog formata i prilikom izlaska iz fokusa prikazuje da je potrebno uneti podatke i okvir polja je obeležen crvenom bojom. Prilikom izlaska iz fokusa polje za lozinku i potvrdu lozinke se boje crvenom bojom ukoliko se ne poklapaju i ispisuje se upozorenje .– index.html

Kada se pristupi index.html stranici imaju dva dugmeta, klikom na dugme buy spušta na deo gde su kaktusi, kada se klikne na drugo dugme show more vodi na deo gde je

tekst. Sadržaji do kojih dugmad vode imaju efekat fadeIn. – index.html

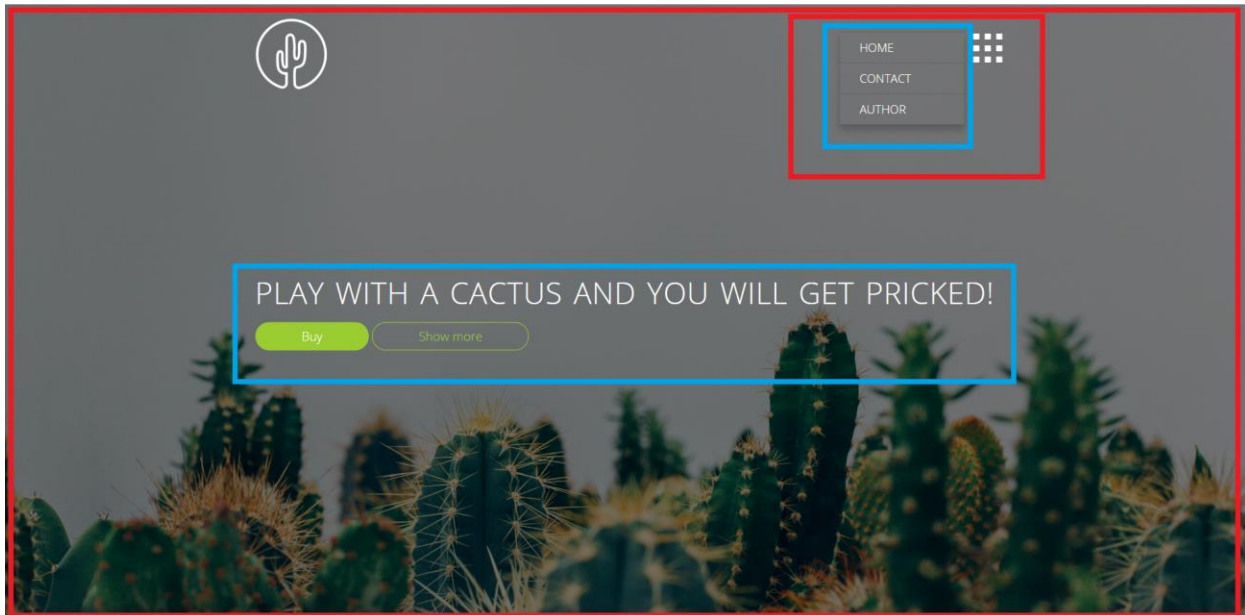

Pri dnu index stranice se nalazi slider koji je rađen u JQUERY-ju, smenjuju se 3 slike koje prikazuju kaktuse.– index.html

Sa desne strane na index.html stranici se nalazi dugme rađeno u JQUERY-ju koje pritiskom vodi do vrha stranice. – index.html

Dinamički ispisani kodovi. – dinamic_cacti.js, dinamic_dropdownlist.js, dinamic_menu_socials.js

1.3 Template

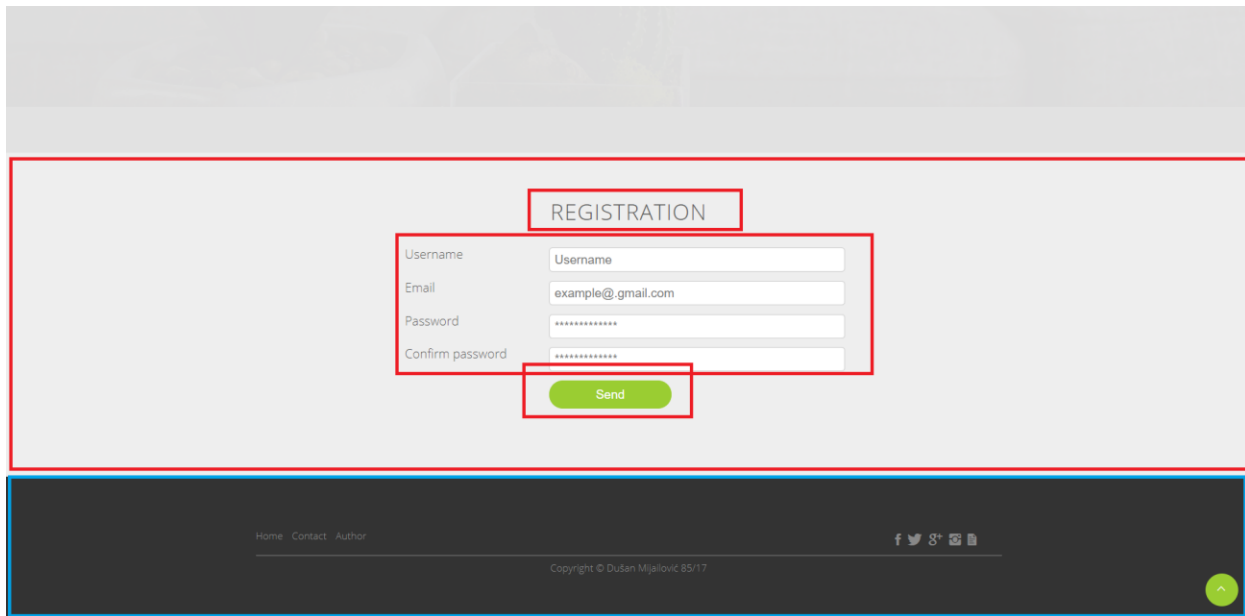

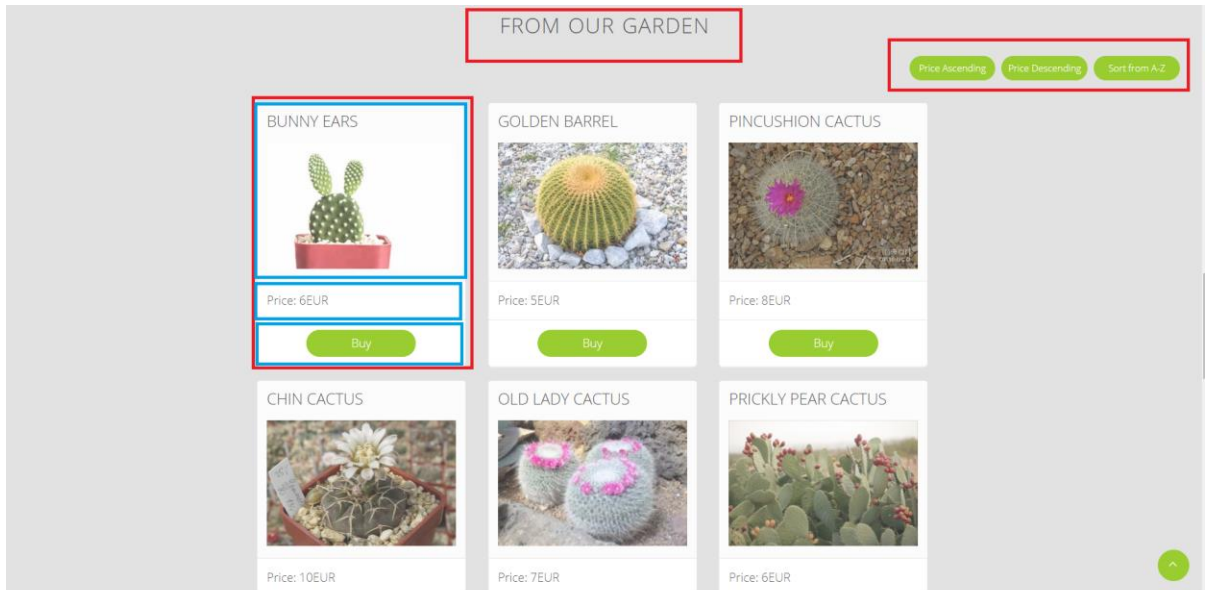

index.html

WHAT IS CACTUS PLANT?

The cactus is a type of plant called a succulent. That means that it can store water in its stems, roots, and leaves. Even if it doesn't rain for a long time, the cactus still has water saved up to help it grow. Thanks to its ability to store water, the cactus can live for over a year without rain! Three most popular cacti:

BARREL CACTUS The Ferocactus genus lives up to its name of fierce cactus, covered as it is with long, rigid spines that protect its juicy, edible pulp. The barrel cactus may live for many decades and eventually reaches a maximum height of 8 to 10 feet when growing outdoors. As a houseplant, the barrel cactus craves as much sun as you can provide, and scant irrigation coupled with a loose, sandy potting mix.	AFRICAN MILK TREE Euphorbia trigona is one of those easy cactus specimens that make every grower feel like an expert. Also known as the cathedral plant, this cactus can grow in excess of eight feet tall, but it is a slow grower and is unlikely to grow much past four feet indoors. Small green leaves grow between thorns on the ridged stems, and if you grow the rubra variety, the leaves are reddish-purple.	CHRISTMAS CACTUS Schlumbergera is pretty toothless as far as the cactus family goes, with its smooth segmented leaves and soft, rounded spines. Tubular flowers come in red, pink, orange and white. This cactus species is a departure from normal cactus care, as the plant hails from Brazilian rain forests, where they live as epiphytes nestled in tree branches. Give plants filtered light and moderate irrigation.

Funkcionalnost na stranici index.html:

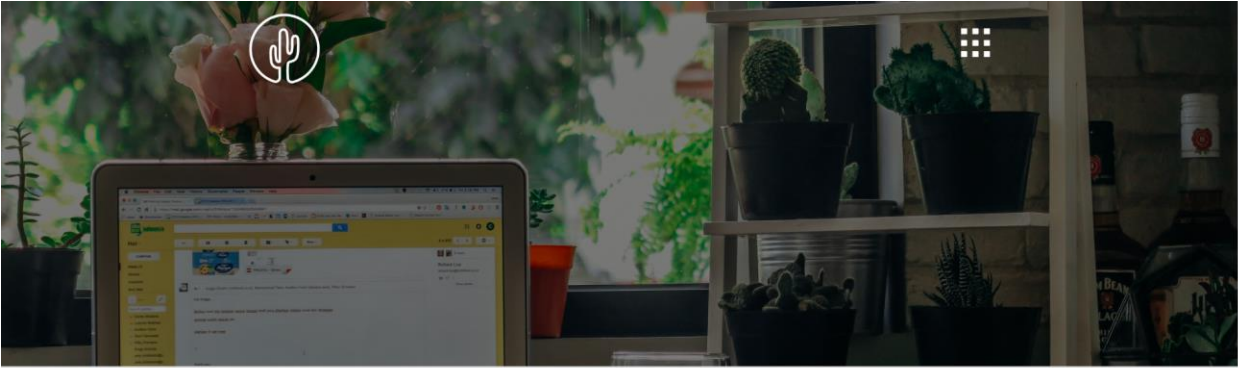

JQUERY – tri dugmeta: u donjem desnom uglu dugme koje odvodi do vrha stranice, prva dva dugmeta koja spuštaju do određenih sekcija. Te određene sekcije se fadeIn-uju. Slider koji smenjuje 3 slike.

JAVASCRIPT – dropdown menu, validacija registracione forme putem regularnih izraza I kad se izadje iz polja obaveštava da je obavezan unos podataka.

JAVASCRIPT – dinamičko ispisivanje

JQUERY – sortiranje po rastućoj, opadajućoj ceni I po nazivu od A-Z

    <p class="paragraph-view box">
      The cactus is a type of plant called a succulent. That
      means that it can store water in its stems, roots, and leaves. Even
      if it doesn't rain for a long time, the cactus still has water saved
      up to help it grow. <br>
      Thanks to its ability to store water, the cactus can live
      for over a year without rain!
      Three most popular cacti:
    </p>
  </div>
  <div class="row" id="scroll">
    <div class="col span-2-of-4 box">
```

Barrel Cactus

The Ferocactus genus lives up to its name of fierce cactus, covered as it is with long, rigid spines that protect its juicy, edible pulp. The barrel cactus may live for many decades and eventually reaches a maximum height of 8 to 10 feet when growing outdoors. As a houseplant, the barrel cactus craves as much sun as you can provide, and scant irrigation coupled with a loose, sandy potting mix.

African Milk Tree

Euphorbia trigona is one of those easy cactus specimens that make every grower feel like an expert. Also known as the cathedral plant, this cactus can grow in excess of eight feet tall, but it is a slow grower and is unlikely to grow much past four feet indoors. Small green leaves grow between thorns on the ridged stems, and if you grow the rubra variety, the leaves are reddish-purple.

Christmas Cactus

Schlumbergera is pretty toothless as far as the cactus family goes, with its smooth segmented leaves and soft, rounded spines. Tubular flowers come in red, pink, orange and white. This cactus species is a departure from normal cactus care, as the plant hails from Brazilian rain forests, where they live as epiphytes nestled in tree branches. Give plants filtered light and moderate irrigation.
